

Export and Import XML Data

We need to export and Import the data of ledgers of to maintain the same ledgers of a existing company in a new company. Further, copy the transactions up to a specific date from the existing company into the new company. We can export the masters and transactions from the existing company in XML format, and import them into the new company.

Export Masters in XML format

Alt +E > Masters

Export

Type of Masters : Ledgers
